# WASP-EZE IS GOING PLACES

Wasp-eze – the unique aerosol answer to stings and bites – is really on the move. Places like Spain, Italy, France. And Britain. Because holiday-makers *everywhere* are packing it into their luggage as insurance against the holiday spoiling tactics of mosquitoes, wasps, bees, hornets, nettles and jelly-fish.

Last year we said we would *double* Wasp-eze sales. And what did we do? We *doubled* them! *Did you double your sales of Wasp-eze?* If not, someone else had your share. **THIS YEAR WE ARE GOING TO REDOUBLE!** Jump on the wagon before it's too late.

# Cost-related scheme 'will save £15m'

A cost-related system of prescription charges would produce a net saving to the National Health Service of £15 million—even after allowing for the cost of administering it.

Sir Keith Joseph, Secretary of State, Department of Health, made that assertion in reply to a series of Commons questions this week.

Sir Keith had been asked what plans he now had for further increases in prescription charges or for charging the patient a proportion of the cost of a drug.

He replied: "Preliminary proposals have been put to the medical and pharmaceutical professions as a basis for discussion and I propose to discuss with their representatives the objections which they see."

"The pharmaceutical industry has been assured that I will inform them of any firm proposals which emerge."

Dr Shirley Summerskill asked him to bear in mind during the discussions that even in the professional bodies of the doctors and pharmacists they had strongly and publicly stressed their opposition to cost-related charges, in view of the fact that such charges would mean that the amount a person had to pay would depend upon the nature of his illness, and might affect the doctors' prescription.

Sir Keith replied that it was because he wanted to understand fully their objections that he was seeking meetings with both the professions.

Mrs Doris Fisher urged him to consider the fact that in cases where there was a shortage of money, patients would be asking the chemist to say which part of the prescription was the most important. That would raise difficult ethical questions between the medical profession and the chemists dispensing the prescriptions.

Sir Keith pointed out that a large proportion of those suffering from pressures of finance would be relieved by the exemption scheme already provided by the Government.

Mrs Shirley Williams urged the Minister to seriously reconsider the cost-related scheme, which she believed could involve some patients, such as those suffering from chronic

mental illness having to meet additional charges of from £1 to £1.50 a week.

Sir Keith replied that the scheme which it was proposed to discuss with the medical and pharmaceutical professions was a parallel of schemes already in operation in such countries as Sweden. "It is not identical but it is parallel."

He denied that additional charges of £1 to £1.50 per week would be involved, and pointed out that the pre-payment certificate limited the total cost of all drugs which might be prescribed to a 1p per day. For that figure any citizen could get complete exemption from all drug charges.

## Reaction scheme is operational

Data on 1,500 well-known drugs, from 10 nations, has been put together in the United Nations agency's computer at Geneva. It is contained in the drug - reaction monitoring scheme set up by the World Health Organisation which is now operational.

A primary phase of the scheme will lead on to a world wide service in May 1974.

Dr B. W. Royall, Australian chief of the programme, told a C&D correspondent that the material comprises 37,000 case reports, entailing 52,000 reactions. He said that, happily, there are no "surprises" yet. There is a 16-man team, from several disciplines, in the monitoring unit.

Material (2,000 case reports a month at present) arrives in bundles by air freight. There is no restriction on the drugs or reactions reported—each centre files what it feels is important.

Meetings of experts are held when the group agrees on key drugs and reactions and WHO doctors remind others of omissions in information.

Input material goes to the coding group for key punching. New occurrences reported go first to the pharmacists and doctors who code specially.

Mr J. McClenahan MPSNI (left), an assistant secretary and local organisations officer of the National Pharmaceutical Union, retired on April 30 after 21 years' service. Mr K. R. Rutter, chairman, presented him with a set of teak coffee tables on behalf of the Executive Committee, and Mr J. Wright, director, presented on behalf of the staff a bell metal mortar and pestle specially cast by the Whitechapel Foundry. Mr McClenahan was secretary of the Ulster Chemists' Association 1939-47

Output summaries are sent to national centres every eight weeks; a volume is produced every six months.

Only the original 10 nations, plus Norway and Denmark, are circularised with details in this primary phase.

The United Kingdom first started in the scheme with only a limited file, but the number of contributions has rapidly increased. Sir George Godber, chief medical officer, Department of Health, is said to be a staunch supporter of the programme.

Participants believe the mechanism will produce richer data than any one country can provide, covering various drug applications and different patient-selection.

They hope that it will serve as an early warning system to avert "therapeutic disasters."

## SPF election results

Results of the Scottish Pharmaceutical Federation Executive Council election, which were declared on April 29, were as follows:

Northern area, J. Conn, Dingwall; Aberdeen and North-eastern area, W. C. D. Bain, Aberdeen, and G. Shepherd, Aberdeen; Dundee and Eastern-central area, B. Brown, Dundee, and D. C. C. Wallace, Dundee; Edinburgh and South-eastern area, A. L. Dunlop, Kirkcaldy, J. W. Goodchild, Falkirk, J. C. Lamb, Linlithgow, and A. Skinner, Edinburgh; Glasgow area, J. Stewart, Glasgow, K. Anderson, Milngavie, D. G. Tarbet, Glasgow, and I. McDougall, Glasgow; South-western area, W. M. Grier, Dumfries, and G. D. Rillie, Cumnock.

## Too few pharmacists?

A suggestion that other life-science graduates could be used to remedy the shortage of pharmacists was made at the annual week-end school of the National Association of Women Pharmacists, held in Nottingham from April 17-18.

The aim could be achieved if such graduates were to spend extra time on pharmaceuticals and forensic studies.

The idea was put forward by a young pharmacologist with a pharmacy qualification who argued that there was now little difference in the training of any of the biological disciplines from that of pharmacy.

Her suggestion, she said, could bring in a sufficient number of pharmacists after the necessary "pre - registration year" — and a breath of fresh air to pharmacy.

The point was made during a discussion on the theme "Women in pharmacy '71."

Other facts that came to light were that resentment is felt that there is no grading system for part-time work in hospitals to allow for experience or capability, and disillusionment of two members working in large London hospitals with the isolation and lack of standing of their departments.

## Booking by 'phone

Pharmacists who have not yet applied for a place at the Pharmaceutical Society's north-western regional conference in Blackpool on May 9 may still make a reservation with the regional secretary, Mr C. Mellor, telephone 061-480 6422 (business) or 061-432 6861 (after 7 pm).

# Mild weather hit chemists' turnover in January-February

Weekly turnover of chemists' shops during January-February was £6.7 million, according to the Nielsen Drug Index. In giving the figures, Nielsen point out that this year was exceptionally mild and there was no great winter sickness. Revenue was, consequently, "little more than average."

Each type of pharmacy suffered a very substantial fall back in counter turnover after the Christmas period peak, it is stated. NHS "more or less held its own."

Average weekly cash sales in retail pharmacies were: Large independents, £393; multiple pharmacies £387; small independents £139. It was estimated that the large independents obtained 56 per cent of the total turnover (cash and NHS) during the period; small independents claiming 28.9 per cent and the multiple pharmacies 15.1 per cent.

The average weekly National Health Service payments per shop were: Large independents, £369, multiples £290 and small independents £182. During January independent pharmacies dispensed 86.9 per cent of NHS prescriptions (an average of 1.767 per shop), while multiple pharmacies dispensed 13.1 per cent (an average of £2,009 per shop).

NHS payments amounted to 38.5 per cent of total turnover in multiple pharmacies and 48.4 per cent in the independents.

## They cost more in EEC

A comparison of prices for 33 articles in the six countries of the European Economic Community and in the UK is given in a survey published this week. For the three items sold by pharmacists — toilet soap 150 g, colour film 35 mm and razor blades (10), the prices in EEC Countries are higher than in the UK, with a few exceptions where they are at the same level.

In new pence the prices given are:

	Toilet soap	Colour film	Razor blades
UK	7½	170	39
West Germany	12½	215	40
France	7½	223	48
Italy	9	206	50
Netherlands	8	253	46
Belgium	9	192	47
Luxembourg	9½	218	46

(Europe in or out, MPC & Associates Ltd, 6 Shaw Street, Worcester.)

## New venture for hospital pharmacy

An important step forward for hospital pharmacy in the United Kingdom takes place on May 22 at a Conference organised by the Guild of Public Pharmacists.

At the afternoon session, under the chairmanship of Professor D. A. Norton, University of Bath, a number of short original papers on current research in hospital pharmacy will be read by their authors. Each paper will be open to discussion.

It is the first time, in the United Kingdom at least, that such a session will have taken place. The papers come from various parts of the British Isles, and not only from practising hospital pharmacists and other specialists in the pharmacy department, but also from undergraduates who have chosen a hospital pharmacy topic for their honours project. The subjects range from gas chromatography and microbiology to wider topics such as hospital pharmacy management.

The morning session will be devoted to a lecture by Dr L. F. Prescott, department of therapeutics, University of Edinburgh.

The conference is being held at Bedford College, Regents Park, London, commencing at 10 am.

Details from the Guild of Public Pharmacists, Premier House, Southampton Row, London WC1 (01-278 2737).

## Changed export recording

New arrangements for recording exports were announced in Parliament last week. Essentially, the scheme would require an exporter to obtain from Customs an identifying number which he may thereafter use on commercial documents for his exportations. When the exporter used his number he

would be accepting the liability to deliver the necessary Customs entry.

Without an identifying number a consignment would have to be pre-entered (statistical details would have to be given to Customs before shipment). Shipping companies and airlines would not be able to load a consignment without an identifying number or a copy of the pre-entry. Exporters using identifying numbers would be required to maintain records of export consignments satisfactory to the Customs.

Exporters using an identifying number would be allowed two weeks after the departure of the ship or aircraft to deliver the Customs entry.

The information made available to Customs under the new arrangements would enable them to check from manifests that all exports have been recorded in the Trade Statistics and to identify readily an exporter who had not delivered the entry for any particular consignment which had been exported.

The new arrangements become operative in the autumn.

## Death of 'Herbie' Gamble

The death of Mr H. W. Gamble, OBE, on May 5, creates a gap in Northern Ireland pharmacy that to his colleagues is seemingly impossible to fill.

"Herbie" Gamble, who has sometimes been referred to as "Mr Pharmacy" in Northern Ireland, was found dead in bed at his home at 29, Cabinhill Gardens, Belfast, 5.

He was a member of Council of the Pharmaceutical Society of Northern Ireland and its President in 1951, a trustee and member of committee of the Ulster Chemists' Association and a member of the Local Pharmaceutical Committee.

Mr Gamble was the subject in the C&D series "Figures in the Pharmaceutical World" (see C&D, April 4, 1953) and in the accompanying comment it was stated: "Often in history the occasion has called forth the man. In the affairs of pharmacy in Northern Ireland the influence of Mr H. W. Gamble in recent years had been strikingly felt, but in addition he has had, and continues to exercise, an influence far beyond the boundaries of that territory."

Mr Gamble owned the business of E. J. Roberts & Co Ltd, Shankill Road, Belfast.

## Defining the 'free' scripts

The Department of Health's campaign to encourage people to take up welfare and social security benefits has been a source of further friction between pharmacists and patients — added to the recent increase in prescription charges.

The Department are offering free or partly-free prescriptions to people with low incomes, and have published a table giving "a very general guide," for various sizes of family, to the gross earnings at which it would be worth claiming.

For a single person, for example, the figure given is £12.95, for a couple with one child, £18.10 and for a couple with three children £22.35.

Some pharmacists have found that patients apparently earning considerably less than the quoted figures have had a claim refused.

The C&D asked the Department of Health how they arrived at their figures. As a guide, we now publish the Department's figures for a family, comprising a married couple with one child under five years old, advertised as being likely to qualify at £18.10 weekly.

	£
Couple, basic requirements	8.50
Child, " "	1.50
Rent	2.75
Fares	0.35
One item on prescription	0.20
Fixed sum	0.30
	13.60

In deciding whether a person qualifies for help, the Department consider his income. The first £2 of income and any tax and National Insurance are not counted. This gives, for the example under consideration.

	£
Income	18.10
Less part of income disregarded	2.00
Tax and National insurance	2.50
	13.60

The Department emphasise that the figures shown in the table are gross amounts.

It is probable that patients are thinking in terms of their take-home pay. Pharmacists should bear this in mind when obeying Sir Keith Joseph's exhortation to bring the take-up scheme to the notice of people likely to benefit.

It should also be noted that some people may not be paying a rent as high as that allowed for by the Department.

# COMPANY NEWS

## Barclay acquire Reynolds & Branson

Barclay Securities have acquired the whole of the issued ordinary share capital of Reynolds & Branson Ltd. The consideration was £200,000 in cash, with a further £180,000 subject to the profits in the year to March 31, 1971, being at the level of £70,000 before taxation, payable on January 1, 1972.

Reynolds & Branson are pharmaceutical distributors in Leeds and the surrounding area and have a national distribution service for pharmaceutical supplies.

Mr John Bentley, chairman of Barclay Securities, announcing the purchase, said: "This acquisition continues Barclay's policy of building a national pharmaceutical distribution network and will add two major depots to the existing 20 already operated. We are looking forward to substantial rationalisation and sales benefits." Net assets of Reynolds & Branson amount to £496,000. The acquisition will increase the turnover of the pharmaceutical group to £16m a year.

Managing director of the new company will be Dr David Love, formerly UK production director of Richardson Merrell.

## ICI to market disposables

Two weeks after announcing an expansion in the United States which will vitally affect their pharmaceutical division, Imperial Chemical Industries Ltd say they have acquired a 51 per cent interest in Medioplast AB from Fortia AB, ICI's partners for many years in a number of Scandinavian companies marketing pharmaceutical products.

They have also acquired the entire shareholding of AB Uppsalaplast, a private company manufacturing a range of products sold mainly by Medioplast.

ICI's pharmaceuticals division is to manufacture and sell a range of disposable medical products primarily in the UK and Europe and ultimately

world-wide. A medical aids department has been formed at the division's headquarters at Alderley Park, Cheshire.

The division is developing its own medical aid products and prototypes are being tested in hospitals in the UK. Distribution of Medioplast products has already started in Switzerland and will begin elsewhere in Europe by the year-end. Hospitals are expected to be the principal customers.

## Two leave NPUM board

Because of their increasing local commitments, Mr Cecil Jacobs and Mr David Morgan have relinquished their seats on the board of NPU Marketing Ltd. Mr Jacobs, who is a member of the NPU Executive Committee, remains a member of the board of the NPUM parent company, NPU Holdings Ltd. Mr Morgan did not offer himself for re-election in the recent NPU Executive Committee elections.

The board of NPU is now: Mr A. Aldington, Mr J. O. Bond (chairman), Mr D. N. Sharpe, Mr J. Wright (managing director).

## Wellcome sets up company in Japan

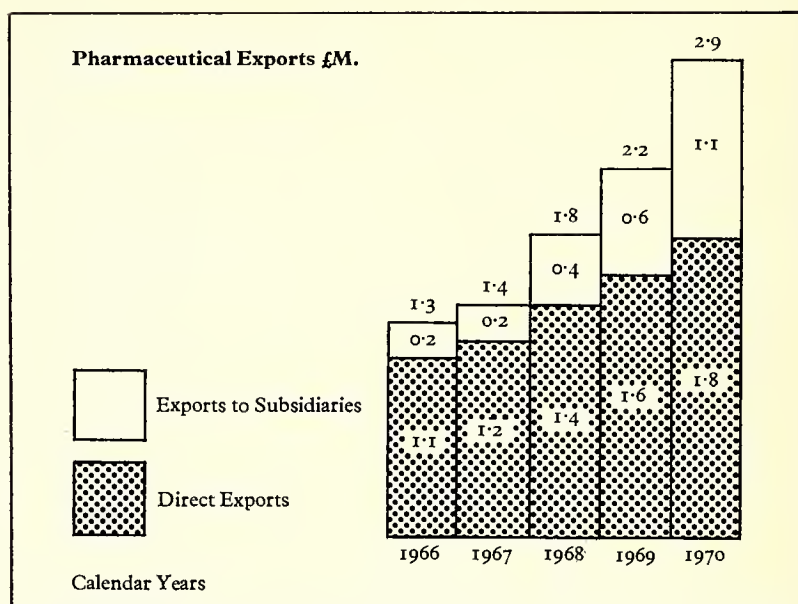

Wellcome Foundation Ltd have now formed a new wholly-owned subsidiary, Nippon Wellcome Co Ltd, to promote products distributed in Japan. Chairman is Dr Fred Wrigley, deputy chairman of the Foundation, and deputy chairman is Mr R. K. Cain, the Foundation's resident manager in Japan. Other directors are Dr Y. Matsumae (executive director), Mr T. Hirabayashi and Mr S. Yamashita — all three of whom are associated with Tanabe Seiyaku, which will continue to import and distribute Wellcome products in Japan — and Mr W. L. Jeffrey, the Foundation's regional manager for Afro-Asia.

## Rockware: 1971 a better year

Rockware Group Ltd confidently forecast improved results for 1971. The company are raising prices this spring.

Capital spending in 1970 amounted to about £2.3m (£3m), the reduction following the completion of the final stages of the Wheatley factory project early in 1970.

While the board has no immediate plans to proceed with its proposed new factory in

The growth in exports by the pharmaceutical division of Fisons Ltd since 1966 is shown by the above diagram reproduced from the company's accounts published this week.

Scotland, a nominal rental is being paid to preserve the option on the agreed site at Kilwinning, Ayrshire.

## In brief

**ICC (UK) Chemicals Ltd** have opened a pharmaceuticals raw materials supplies department at 199 Piccadilly, London W1V 9LE. This is in addition to the company's activities within the UK concerning the purchase and sales of industrial chemicals. Mr M. Bailis is in charge of the new department.

**Allen & Hanburys Ltd:** More than 100 executive and sales staff of the company attended a sales conference at Randers, Jutland, last week. Main theme of the talks was the company's Ventolin inhaler.

**United Glass Ltd** (subsidiary of Distillers): Group trading surplus for 1970 was £3.78m (£3.05m), net profit after tax £0.93m (£0.22m).

## Appointments

**Carter-Wallace Ltd** have made the following appointments to their sales force. Mr E. Collins (North London, Middlesex and Bucks), Mr A. M. Morris (East Lancs), Mr B. P. McAndrew (West Midlands), Mr B. Glasson (Wales), Mr B. O'Donnell (Central London), Mr P. G. Bunce (East Anglia, Cambs, Northants and Beds), Mr D. J. Grace (Devon, Cornwall and West country) and Mr H. W. Benjamin (Scotland).

**Merrell division, Richardson-Merrell Ltd** have promoted to the position of senior representatives the following: Messrs

T. C. Brown (Glasgow), T. M. Cox (Bristol), J. Cragg (Kent), R. F. Gunn (East London), M. J. Hunt (Durham), R. A. Letch (Leeds), D. A. K. Minors (North Wales), J. I. Swash (Potteries, North Staffs), and G. F. Wood (Cheshire).

**British-American Cosmetics Ltd:** Mr Sabbat Strianse, takes on overall responsibility for research and development in all the cosmetic, toiletries and perfumery companies in the BAC group. He will remain at the laboratories of Yardley USA, Totowa, New Jersey, and will continue to have special responsibility for the laboratory there. His new position will be in addition to his present office as vice-president of research and development for Yardley Inc, USA.

**Wellcome Foundation:** Mr Michael King has been appointed marketing executive in their group marketing (medical) division in London. He will be concerned with cardiovascular drugs and insulin.

**Radiol Chemicals Ltd** have appointed Mr S. D. Arthur to the board. Mr Arthur joined the company in 1961 as a sales representative, and in 1968 was appointed sales manager.

**Johnsons of Hendon Ltd:** Mr J. E. Balmer, managing director, has in addition been appointed chairman. Mr E. S. Houghton has retired from the position of chairman but continues as a director.

**Chesebrough-Pond Ltd** have appointed Mr Cecil Grice their general sales manager.

**Victor Blagden & Co Ltd** have appointed Mr M. M. Whyte, BSc, to the board.

# who wants

## Ken's gun? *asks Dr. Crowther*

When the new mother walks into her pharmacy she will find Carresin (*"Tops—for bottoms"*) awaiting her. No longer will Ken Rivers get these *"I can't get Carresin"* letters: and so the famous gun is up for sale. The reason? We have appointed Richards and Appleby as Distributors . . . When the "R and A" man walks into *your* pharmacy let him tell you the interesting technical background to this final solution to a long-standing problem—*preventing* "nappy rash" rather than attempting to cure it.

# Carresin

*Tops . . . for bottoms*

Sole distributors in the U.K.:

**Richards and Appleby Limited**  
12A St. George Street,  
Hanover Square, London, W.1.

For working samples please write to  
Dr. H. A. H. Crowther  
Carresin Limited, Reading, Berkshire.

# PEOPLE

**Mr J. McClenahan, MPSNI**, who has officially retired after nearly 21 years' service with the National Pharmaceutical Union (see p 561) intends to return to Northern Ireland where he began his pharmaceutical career. "Mac," as he is affectionately known by most of his colleagues in pharmacy, has two main hobbies: he spends many hours at wood-turning, having frequently been asked to furnish mortars, pestles, etc, for presentation purposes, and he is an acknowledged exponent of Irish folk songs. Mac was closely connected with the St Albans Amateur Operatic Society and he has been described as the "Gilbert and Sullivan specialist" of that city. His many friends in pharmacy will join the *C&D* in wishing him and his wife a happy retirement.

**Mr Alastair Mackay, MPS**, Kirkcaldy, Fife, has spent his spare time in the past three months building a sailing dinghy in his spare bedroom. When it was completed the only way it could come out was through the bedroom window. Mr. Mackay was able to launch his Mirror class dinghy on Kinghorn Loch and had a successful trial. He hopes to race the dinghy at many of the regattas held along the Fife coast this season.

**Mr Brian V. Atkins**, since April 15 chairman of the Northumbrian branch of the Pharmaceutical Society, is believed to be the only pharmacist among 250 voluntary wardens of the Northumberland National Park. As such he takes part, on a rota basis, in preserving its amenities and guiding visitors in right ways of using it. Being also a voluntary rescuer, Mr Atkins is liable to be — and indeed has been — called out to deal with emergencies during business hours. During such absences his wife, also a pharmacist, takes charge.

## Deaths

**Kilgariff:** On April 21, Mr Richard Stephen Kilgariff, MPSI, Mayfield House, Tuam, co Galway, aged 63, Mr Kilgariff qualified in 1934 and conducted a pharmacy in Tuam. He was a past president of the

West of Ireland Chemists' Association and was among the speakers at the annual Pharmacy Congress in Sligo in October 1970.

**Linehan:** On April 9, Mr Henry Joseph Linehan, MPSI, Mountbellew, co Galway. Mr Linehan qualified in 1950 and practised in Zambia for a number of years, returning to Mountbellew, where he acquired a pharmacy which he conducted to his death.

**Duffy:** On April 18, Mrs Margaret Duffy, MPSI, 11 Devon Park, Lower Salthill, Galway. Mrs Duffy qualified in 1949.

**Hallahan:** On April 9, Mr Patrick Joseph Hallahan, MPSI, The Square, Dungarvan, co Waterford. Mr Hallahan qualified in 1916.

**Jeffrey:** On April 27, Mr Alexander Jeffrey, MPS, FBOA, 16 Greenlaw Avenue, Paisley, Renfrewshire. Mr Jeffrey, director of Robert Stewart (Chemist) Ltd, qualified in 1928.

## NEWS IN BRIEF

□ The Italian cosmetics and toiletries industry, will be putting its products on show in London when 27 leading firms participate in an exhibition — "Cosmetics, Perfumes and Wigs from Italy," at the Italian Trade Centre, 25 Old Burlington Street, London W 1, May 11-14.

□ Family Doctor Publications are launching a series of filmstrips based on their booklets. Primarily designed for teaching and discussion purposes, the first six strips now available reflect topics of particular interest to young people.

□ Entry forms are now available for Starpacks 1971, organised by the Institute of Packaging. They are available from the Secretary, Institute of Packaging, Malcolm House, Empire Way, Wembley, Middlesex HA9 0NJ.

□ A second supplement to the thirteenth edition of the US National Formulary has been published by the American Pharmaceutical Association, Washington, DC 20037. It became official on April 1.

□ Latest in the series of paperbacks from Consumers' Association is "Eyes Right," written for the layman and explaining briefly how the eye works, and how eye and sight conditions occur and are treated. Cost is £0.60 post free from Consumers' Association, 14 Buckingham Street, London, WC 2.

## Topical reflections By Xrayser

### The deterrent

Sir Keith Joseph (Secretary of State for Social Services) stated in the House of Commons last week that the Government had deliberately set about fashioning a new system of priorities in the National Health Service, but that they would not design any changes that would deter patients from necessary treatment (p 528).

He said that they would have to see whether there was any evidence of people whose income was low enough to deter them from seeking medical attention because of the new NHS charges, but did not get exemption. He would, he said, be watching during a period of 12-24 months the effectiveness of the campaign designed to ensure that people would take up their entitlement.

In the course of the debate, two statements were made which are, even at this early stage, open to question. The Minister said that the gross saving in charges would be £37 million, but the net saving would be £7 million less due to increased supplementary benefits and extra exemptions. The other statement, made by Mr E. M. Taylor of the Scottish Office, was to the effect that one half of all prescriptions would be exempt. Both statements seem to presuppose that the prescription pattern will remain unaltered, an unwarranted assumption in my own experience of one month of the new charges.

There has, for example, been a noticeable, if not altogether a surprising, change in the proportion of charged forms to exempt, and while Mr Taylor's statement described reasonably accurately the situation up to March 31 — the month just finished presents a totally different picture. But that is not all.

#### Professional deterrence

Prior to March 31 there was a small difference in favour of exempt prescriptions in the matter of item/form relationship. That was understandable, for some conditions of older people require comprehensive medication. But the difference over the month of April has been most marked, the item rate in the charged forms having slumped by as much as 20 per cent. There must be an explanation.

The doctor is acting with restraint and constraint. It would be grossly unfair to suggest that, in the past, he has prescribed needlessly or recklessly. That I do not for one moment believe. But he is now apparently having regard to the effect of such charges on the budgets of people who may not, by the smallest of margins, qualify for exemption.

And that, if we carry the argument a little further, amounts to interference with the physician's professional judgment and becomes, as Mr W. M. Darling said recently, health by wealth, even before the advent of cost-related charges to which Mr Darling was then referring.

#### Help for the needy

There is another aspect to factors of deterrence. I have attempted to comply with the Minister's request that all who come into close contact with apparent hardship should help in any way they can. I set the machinery in motion on behalf of a man who suffers from a chronic illness not included in the small recognised list. The fact that there was hardship was finally accepted after the lapse of 23 days of writing and telephoning on his account. Only dogged determination brought success. How many are deterred by the official machine and the personal problems it poses?

# NEW PRODUCTS AND PACKS

## Cosmetics and toiletries

### Groundhog bubble bath and soap

Through a franchise agreement made with Dunlop Ltd, Jean Sorelle have been appointed sole concessionaires in the toiletry and allied fields for their own-manufactured products under the Groundhog name. The first two products are Groundhog bubble bath in blue, yellow and red (£0.45) and Groundhog toilet soap in green, orange and mauve (£0.30). (Jean Sorelle Ltd, 111-113 Great Portland St, London W1N 5FA.)

### Five Factor Colognes

A collection of Colognes in five fragrances is an important addition to the Max Factor fragrance range.

Eau de Toilette spray (£0.59) is available with Primitif, Hypnotique, Electrique, Exuberance and Jonquille fragrances. Eau de Toilette spray is presented in elegant 1-oz glass bottles decorated with a gay band of colour to identify each fragrance.

Another product, Jonquille talc (£0.30) will make its appearance shortly in a pale yellow lightweight, streamlined container similar to the other talcs in the range. (Max Factor Ltd, 16 Old Bond Street, London W1X 4BP.)

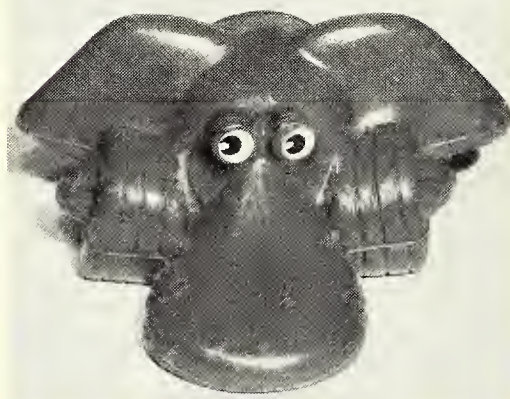

### Lentheric double for men

From Lentheric there is a choice of two new antiperspirant deodorant sprays for men. The first is the fresh citrus fragrance of Onyx antiperspirant deodorant (£0.98), the second "the man-of-the-world sophistication" of Centaur antiperspirant deodorant (£1.12). Both products are 140-g aerosol packs claimed to offer 24-hour "assurance of amiability." (Lentheric, 17 Old Bond Street, London, W1.)

### Butterflyes from Miners

Miners say it's a butterfly summer in fashion, with butterfly motifs appliquéd on dresses, shoes and belts. They have therefore designed a butterfly eye-look. Two or three shades of eyeshadow are blended with a firm sponge applicator into a butterfly shape around the eye.

The new products from Miners to achieve this look consist of: New Butter-

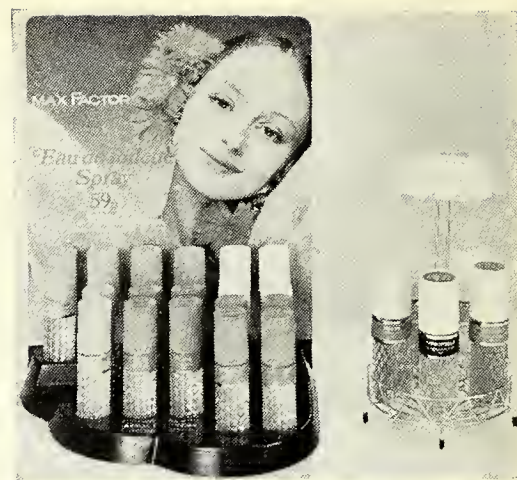

fleyes Eye Kit (£0.35p). A four colour eye shadow kit with applicator in Heather Mauve, Heather Pink, Deep Blue and Light Blue. New Miners Pearly Shadow (£0.17p). A reformulation of Miners Frosted Shadow in six shades: Heather Mauve, Heather Pink, Blue, Aqua, Beige and White. New Shades of Frosted Eye Shiner £0.25p). A non-greasy pearly cream in four new shades: Dusky Pink, Smoky Mauve, Bronze and Aqua.

A new real hair lash called Sweepers is long, fine and feathery in black and brown. Complete with How-to-use leaflet and adhesive (£0.55).

Miners say that teenagers are asking more and more for strong definite colours in nail polish, rather than the pale, pearly pink colours. So following the success of Gypsy Clover in the Frosted range of nail polishes they are introducing Murky Mauve, a dusky, pinky mauve in the Plain formula (£0.14). Another introduction is a strong, mahogany brown into their Matte Shadow Stick range to add to the current shades of: Mauve, Blue, Green, Sky, Turquoise and White (£0.15). (Miners Make Up Ltd, Surbiton, Surrey.)

### Coty Air Spun

A new range of face make-up has been created by Coty. It includes Air Spun fluid make-up in four shades. Fair Spun, Beige Spun, Amber Spun and Sun Spun (£0.60). The same four shades are offered in the complementary Air Spun matte make-up (£0.65) and Air Spun pressed powder (£0.80). Air Spun finishing powder is offered in the same four shades plus transparent, together with the "re-launched" Continentale and Azalee (£0.80). Packaging of the whole range has been designed in gold and bronze and white and the fragrance throughout is Coty original L'Aimant perfume. (Coty

(England) Ltd, Great West Road, Brentford, Middlesex.)

### Pond's lemon cream

Pond's new lemon cream is claimed to be formulated "to counteract and control the shine that comes from over-active oil glands." It may also be used as a "pre-foundation," to keep make-up matt.

New lemon cream will be extensively advertised in young fashion magazines including *Honey*, *Petticoat* and *19* from the end of June. An attractive pre-pack counter display unit is available from Chesebrough-Pond's representatives. Neat and compact, it holds three large, four medium and five small jars of the new product. (Chesebrough-Pond's Ltd, Victoria Road, London NW 10.)

### Helena Rubinstein's new range

For those with an oily skin, Helena Rubinstein have developed Skin Balance — a range consisting of five preparations, each with a specific function. Skin Balance Pre Make-up Normalizer (£1.75) is to prevent "daytime shine." Normalizing Cleanser (£1.25) is a concentrated pale green creamy foaming cleanser that removes oil, grime and make-up. Normalizing Toner (£1.20) is an astringent lotion. Normalizing Granules (£1.00) create a friction wash to help wash away black-heads, whilst Normalizing Masque (£0.75) is described as a creamy pale green 10 minute beauty facial that leaves the complexion smooth and silky.

Helena Rubinstein are also introducing

When a customer seeks your professional advice on the prevention of sunburn – particularly before going off on holiday abroad – you can confidently follow the advice of most dermatologists and recommend Uvistat cream and Uvistat-L.

For most people the U/V waveband that produces sunburn is limited to 290-310 n.m. – but for a significant minority, longer wavelength U/V causes skin damage.

You can't say which your next customer will be. But Uvistat will provide protection. It screens U/V not only in the erythema spectrum (290-310 n.m.) but well beyond – up to 370 n.m. And it is often the longer-wave radiation that does the damage.

#### SPECIAL BONUS TERMS

For every 1 dozen Uvistat Cream and 1 dozen Uvistat-L you get 2 free 50 g. tubes of Uvistat Cream. This gives you a profit of 66%.

Cost to you: 1 dozen Uvistat Cream £3.24; 1 dozen Uvistat-L £2.76; total £6.00. Retail selling price: 1 dozen Uvistat Cream £4.92; 1 dozen Uvistat-L £4.20; plus 2 bonus packs 82p; total £9.94. This gives you a profit on cost of £3.94 – which equals 66%.

This offer applies only to orders sent direct to WB Pharmaceuticals Ltd. (for invoicing through your wholesaler of choice) or taken by our representatives. Offer closes on 30th June 1971.

Uvistat contains 4% mexenone (included in the B.N.F.) in a vanishing cream base. It is available as Uvistat cream 50g for general application, Uvistat-L as a lipscreen. Since no purchase tax is involved – you receive the full margin.

Fulton House, Empire Way, Wembley, Middlesex. HA9 0LX.

Continued from page 568

Apple Blossom Skin Perfume in a new 1-oz bottle (£0.60) and Apple Blossom Icy Splash Cologne (£0.95). (Helena Rubinstein Ltd, 3 Grafton Street, London, W 1.)

### A trio of bubble baths

From Andre Philippe comes Trio bubble bath gift set (£0.62½), containing an assortment from six of their attractive colour bubble baths.

The bottles are cylindrical with round-shouldered tops and gold metallised caps with matching bows. The gold screen-printed bottles contain a total of 240cc.

The display outer is a multi-colour spot bubble design on white background, using Astralux board with acetate window front. All boxes are individually sleeved. (Andre Philippe Ltd, 71 Gowan Avenue, London SW 6.)

### Veterinary

#### Tardak for dogs

The normal sex drive of male dogs, used by police, custom control and other services, as well as that of pets, can be objectionable say Syntex Pharmaceuticals Ltd.

To combat it they have introduced Tardak, a presentation of a potent anti-androgen, delmadinone acetate, for intramuscular and subcutaneous administration.

Packs of 10 mls (£2.55) containing 10 mg per ml. Recommended doses average 1-1.5 mg/kg body weight. (Syntex Pharmaceuticals Ltd, Veterinary Department, St. Ives House, Maidenhead, Berks.)

### Sundries

#### Slimming and exercise device

Slim Spin is a device comprising two metal discs which rotate against each other on ball bearings. The user stands on Slim Spin and does a variety of exercises recommended for toning up stomach muscles and losing weight. The manufacturers believe Slim Spin can be the "Craze of 1971-1972." (Slim Spin Co, 189 Regent Street, London W 1.)

### Household

#### Insect killer in small spaces

A new Shell domestic insecticide product is Vapona small-space insect killer (£0.30) designed to solve the insect problem in small confined spaces such as small kitchenettes, cupboards under stairs, lavatories, under sinks, in sheds and small greenhouses, caravans and refuse bins.

The new product comprises a small yellow insecticide strip in a white plastic holder which is easily hung to allow free circulation of air around it. One Vapona insect killer is said to continuously protect up to 200 cubic feet of enclosed space for up to four months generally, and up to six months in totally enclosed poorly ventilated spaces such as cupboards under stairs. Vapona is effective against flies, beetles, earwigs, cockroaches, silverfish, moths and mosquitoes. For the control of insects in larger areas, the new compact Vapona flykiller should be used at the rate of one per 1,000 cubic feet of space in the home and one per 750 cubic feet in the greenhouse.

The new compact Vapona flykiller and Vapona small-space insect killer are available in new display units of 12. (Smith & Nephew Ltd., Bessemer Road, Welwyn Garden City, Herts.)

## PRESCRIPTION SPECIALITIES

### MIGRALEVE tablets (Duo-treatment)

**Manufacturer** International Laboratories Ltd, Sunbury-on-Thames, Middlesex

**Description** Biconvex film-coated, pink tablets, each containing 6.25 mg buclizine dihydrochloride, 500 mg paracetamol BP, 8 mg codeine phosphate BP and 10 mg dioctyl sodium sulphosuccinate and yellow tablets each containing 500 mg paracetamol BP, 8 mg codeine phosphate BP and 20 mg dioctyl sodium sulphosuccinate

**Indications** Symptomatic and prophylactic treatment of migraine and variants, including migrainous neuralgia (cluster headache), facial and ophthalmoplegic migraine and "sick" headache

**Contraindications** Migrainous patients suffering from high blood pressure should first be treated independently for this condition

**Dosage** Treatment: At onset—2 pink tablets, if symptoms persist—2 yellow tablets every three or four hours. For prevention and prophylaxis, see further literature. Maximum dose: normally a total of 8 tablets (2 pink and 6 yellow) during any 24-hour period. Children: normally 1 tablet of the appropriate colour where 2 are indicated for adults

**Side effects.** Although the dosage of buclizine dihydrochloride is small, with patients

sensitive to antihistamines, drowsiness may occur. Prophylactic treatment, given at night, can avoid this reaction

**Precautions** Individuals with a history of renal disease should be treated cautiously as with any long-term analgesic therapy

**Packs** 12 tablet pack (8 pink, 4 yellow) (£0.2143, trade +PT) 24 tablet pack (16 pink, 8 yellow) (£0.3857 +PT) and supplementary 8 tablet pack (yellow) (£0.1125 +PT)

**Supply Restrictions** PI, DDA (invoice only)  
**Issued** May 1971

### SCRIPTLAX syrup

**Manufacturer** Concept Pharmaceuticals Ltd, Russell House, 59 High Street, Rickmansworth, Herts

**Description** Dark brown syrup containing in 5 mls standardised senna extract equivalent to 15 mg total sennosides

**Indications** Constipation

**Contraindications** Intestinal obstruction

**Dosage** Adults: 5-10 ml daily, or as necessary, children: (over six years) half the adult dose (under six years) as directed by a physician

**Side effects** Excess may cause griping

**Shelf life** Stable for two years. Store in a cool place

**Dispensing diluent** Water

**Pack** Bottle of 100 ml (£0.35, trade)

**Issued** May 1971

### EXTROVENT tablets

**Manufacturer** Concept Pharmaceuticals Ltd, Russell House, 59 High Street, Rickmansworth, Herts.

**Description** White flat-faced bevelled-edged tablets, each containing ephedrine hydrochloride BP 15 mg, phenobarbitone BP 8 mg and theophylline BP 120 mg

**Indications** Chronic bronchitis and bronchial asthma

**Contraindications** As for ephedrine

**Dosage** Adults: 1 or 2 tablets, three times a day and at night. Not recommended for children.

**Pack** 100 tablets (£0.36, trade)

**Supply restrictions** PI, SI, S4A

**Issued** May 1971

### PALEVA tablets

**Manufacturer** Concept Pharmaceuticals Ltd, Russell House, 59 High Street, Rickmansworth, Herts

**Description** Round yellow, flat-faced, bevelled edged tablets, each containing aspirin 300 mg and paracetamol 500 mg

**Indications** Analgesic, antipyretic

**Contraindications** Known hypersensitivity to aspirin, advanced kidney disease

**Dosage** Adults: 1 or 2 tablets, three or four times daily

**Side effects** Gastric intolerance may occur in some patients

**Packs** 50 (£0.37½, trade); 100 (£0.70)

**Issued** May 1971

### SILOXYL tablets

**Manufacturer** Concept Pharmaceuticals Ltd, Russell House, 59 High Street, Rickmansworth, Herts

**Description** Round white biconvex tablets (¾ in diameter) each tablet containing dried aluminium hydroxide gel BP 500 mg and 250 mg polymethylsiloxane

**Indications** Symptomatic treatment of dyspepsia, abdominal distention, gastritis, heartburn in pregnancy or hiatus hernia; as adjunctive therapy in peptic ulcer

**Dosage** 1 or 2 tablets chewed or sucked between meals, and at bedtime if necessary. Not recommended for children

**Storage** In a cool place

**Pack** 120 tablets (£1.57, trade +PT)

**Issued** May 1971

# TRADE NEWS

## Macdonalds and Illingworths

Macdonald & Taylor Ltd are taking over the sales interests in cotton wool products of Illingworths of Shelf, Yorks, who are ceasing production of those lines on May 31.

Illingworths have manufactured special forms of cotton wool for the pharmaceutical and packaging industries as well as undertaking private label contracts.

They are advising their customers that trade inquiries should be sent in future to Macdonald & Taylor Ltd, PO Box 6, Portland Street, Ashton-under-Lyne, Lancs.

## Special rates from Trufood

Two special offers covering both their baby cereals and their Toddler meals are being made by Trufood. Until July 10 all orders for both Baby cereal, oats and Baby cereal, maize, wheat, oats, placed direct will be invoiced at the special rate of £0.75 per dozen.

Since not all chemists could take advantage of the introductory bonus offer for Toddler meals as this was made during the Christmas period the company are now making a new offer. Under this all orders for these foods placed direct before July 10 will be invoiced: 1-9 dozen at £0.89 per dozen; 10-19 dozen at £0.85 per dozen; 20-29 dozen at £0.83 per dozen; 30-59 dozen at £0.81 per dozen; 60-99 dozen at £0.79 per dozen; 100-199 dozen at £0.78 per dozen; 200 dozen and over at £0.77 per dozen.

## Lip-Aide repackaged

Roger & Gallet, 16 Lettice Street, London W1, have repackaged Lip-Aide (£0.20) "an emollient, sweet-smelling lipstick" which is offered in two shades, white and

pink, both to soothe chapped lips and to lend a hint of colour to them.

## Isolevin tablets

John Wyeth & Brother Ltd, Huntercombe Lane South, Taplow, Maidenhead, Berks, announce that their product Isolevin tablets has been discontinued. All stocks are exhausted. Isolevin will still be available in the 10 ml spray solution.

## Distribution change

Rona Laboratories Ltd, Cadwell Lane, Hitchin, SG4 0SF, have recently taken over the distribution of Isoxyl from the manufacturers Continental Pharma. Isoxyl 500-mg tablets are packed in containers of 500. Rona also give notice of their intention to withdraw the 500-tablet pack of Adenotriphos.

## British Chemicals list

The 1970 edition of "British Chemicals and Their Manufacturers" has just been published and is available to bona fide persons interested in the purchase of chemicals and allied products (Chemical Industries Association, Alembic House, 93 Albert Embankment, London SE 1.)

## Coating change

Towards the end of the month Lederle Laboratories are introducing a film-coated version of the Ledermycin tablet 300 mg. It will, in due course, replace the current sugar coated form. The film-coated tablet will be slightly smaller than the sugar-coated one, and will bear the code number 9270. There will be no price change.

## Welldorm to be coded

Smith & Nephew Pharmaceuticals, Ltd, Welwyn Garden City, Herts, are continuing their programme of coding their products by introducing shortly the coding SNP 3 for their 650-mg Welldorm tablets. The coding is the same style as Narphen — the first product to be coded.

## Buxton rubbing bottles

Brian S. Westmacott Ltd, Manchester M4 6H3 have ceased to manufacture Buxton rubbing bottles. The trade marks and all rights in the manufacture and distribution have been acquired by Buxton Chemical Products, 12 Ribble Street, Lytham St Annes, Lancashire, to whom all orders should be sent.

## Agents in Republic

Dominick A. Dolan & Co Ltd, Broombridge, Dublin 11, have been appointed sole distributors in the Republic of Ireland for the products of Macdonald & Taylor Ltd, Ashton-under-Lyne.

# Bonus offers

Faberge Inc, Ridgeway, Iver, Bucks. Kiku eau de parfum spray ½ oz (£1.35). Display unit of 12 invoiced as 11 (until June 18). Kiku Cooler Kit talc 5 oz and splash on eau de Cologne 6 oz (£2.75). Display unit of 7 invoiced as 6.

W. B. Pharmaceuticals Ltd, Fulton House, Empire Way, Wembley, Middx. Two free Uvistat cream with 12 Uvistat cream and 12 Uvistat L. Direct orders or through representatives (until June 30).

# living rooms this Summer.

This crab is the star of our new television campaign.  
(He's also the villain.)

We'll show how clearly he can be seen through Polaroid sunglasses. And how he can barely be seen through regular sunglasses.

It's so convincing that we're spending more than ever to show it on television. (33% more than last year.)

As well as supporting it with a campaign in the Daily Express.

By the end of the summer, millions of people will know

that Polaroid sunglasses can eliminate up to 99% of reflected glare.

They'll know that they're shatter and scratch resistant. And that they're more beautiful than ever. (This year we'll be killing glare with seventeen new sunglass models. Many with see-through lenses in grey and tan.)

People will also know that if they're looking for a crab, the easiest way to find him is with Polaroid sunglasses.

## Polaroid Sunglasses.

Other half of crab seen  
through regular sunglasses.  
(they only darken glare)

# It's a real loser.

We've had a clever new idea for a weight-loss programme that's going to be a winner.

It's called the Sweetex Slim-Kit, a neat little box with all a woman needs to lose weight, and keep the pounds off once she's lost them.

We've included Sweetex pellets and liquid Sweetex, with 24 calorie-controlled Sweetex recipe cards. Weight loss and weight control plans. A calorie chart. A weight recording chart.

And a series of simple exercises to be done around the house.

The recommended retail price of our Slim-Kit is 39p (trade price £3.53 a dozen),

and we're  
advertising  
it during  
the  
early

summer  
in important  
mass market

women's magazines,  
including Woman.

Woman's Own, Woman's  
Realm and Woman's Weekly.

There'll be a big demand for the Slim-Kit, because slimming is a subject very dear to

almost every woman.

So get in a stock of the Sweetex Slim-Kit right away.

We'd hate you to lose out on a real winner.

**The Sweetex Slim-Kit is the smartest way to make a packet.**

# COMMENT

## Hospital pay: end the delay

The *C&D* of April 10 reported two important facts in relation to hospital pharmacy.

"The draft proposals for the implementation of the Noel Hall Report on the Hospital Pharmaceutical Service have been circulated by the Department of Health" (page 413) and ... "increase in the salaries of all grades of hospital pharmacists together with salary scale for the new grades (page 435) ..."

It is clear then, that both the administrative division and Whitley Council division of the Department of Health are ready to translate the Noel Hall Report from its many sheets of paper into a working organisation. What then is holding up the negotiations? It must be the staff side's dissatisfaction with the offer either as a package deal or with its total content.

That the deal should have been a package at all is shoddy on the part of the management side. That they have offered a general increase as part of it is an indication that they believe that the change to a new system will be long drawn out and will last much more than a year, which is the accepted time lapse between salary negotiations.

The salary claim that was submitted before Christmas had this in mind because it contained no reference to the new grades, even though the staff side must have formulated their ideas following Sir Keith Joseph's acceptance of the principles of the report.

One of two lines of thinking must be in the management's mind, either to make the package a means of rushing through the new scales or to use prolonged negotiations as a method of delaying a settlement.

The staff side of Whitley Council C is on the horns of a dilemma. To continue the negotiations seems to be

their aim, although one wonders how much actual negotiation is available under the present inflexible Government financial policy.

In the initial stages of the talks this was the only possible course of action, but as time goes on (three months to date), is it not ripe to reconsider the position against the wider national picture? The present Government promised at the time of the election that there would be no wage freeze, but daily there are increasing signs that a freeze of some kind is inevitable. Whatever kind of freeze it is, it will hit the public sector first. If the negotiations are prolonged hospital pharmacists may be faced with a suspension of negotiations on the new structure.

## Back into the melting pot?

Perhaps the Government's financial position may take a turn for the better, but we are still faced with the imminent publication of the White Paper on the reorganisation of the health services. This could throw the whole reorganisation back into the melting pot with subsequent delays and alterations. For the staff side to accept the best they can at this time, having made the point that they are by no means satisfied with the offer, and to get on with the reorganisation may therefore be a safer avenue of approach—a parallel with the contractors' decision in February. The overall increase would then become effective in time to help recruitment of new graduates this summer, which will be essential to the success of the new scheme.

There would be a nearer end to the tensions and uncertainties that are occupying the minds of hospital pharmacists, but most of all there will be a quicker return to the negotiating table with experience from the new structure to back up claims for the better salaries and conditions they so urgently need.

## BOOKS

**Laboratory instruments & techniques series.** Krogan Page Ltd, 16 Gray's Inn Road, London, WC 1.

Contain a concise account of the background theory to a group of instruments and describe the practical procedures involved with a description of the basic forms of the instrument and details of variants and accessories. A list of internationally available instruments is given to guide prospective purchasers of a particular instrument.

First three titles published in this new series are: Electron microscopes by J. A. Swift (£2); Gas chromatography by J. A. Simpson (£2.50); pH Meters by A. Wilson (£2).

**Advances in chromatography, Volume 9.** J. C. Giddings and R. A. Keller (editors). Marcel Dekker Ltd, 14 Crawford Rise, Maidenhead, Berks. 9 x 6 in. Pp xiv + 358. £8.90.

Contains five articles, one on general chromatography and four on gas chrom-

atography, including the determination of optimum conditions for gas chromatographic separations, radiochemical separations by GLC and analysis of volatile flavour components of foods.

**Infrared spectroscopy: experimental methods and techniques.** J. E. Stewart. Marcel Dekker Ltd, 14 Crawford Rise, Maidenhead, Berks. 9 x 6 in. Pp. xiii + 636. £17.35.

Chapters on experimental methods in transmission, reflection and emission infra-red spectroscopy and on advanced methods are preceded by an introductory section, a consideration of geometric and physical optics necessary for understanding the remainder of the book and a section on the electronics of the spectrophotometer.

**Peptides: chemistry and biochemistry.** B. Weinstein and S. Lande (editors). Marcel Dekker Ltd, 14 Crawford Rise, Maidenhead, Berks. 9 x 6 in. Pp. xv + 538. £9.30.

Comprises the papers delivered at the American Peptide Symposium held at Yale University, August 13-18, 1968. Papers are classified into four sections:

peptide synthesis; relationships between structure and biological activity; racemisation in peptide chemistry; and special problems in synthesis and analysis.

**The new cosmetic formulary.** H. Bennett, FAIC. Chemical Publishing Co Inc, 212 Fifth Avenue, New York, 10010. 8½ x 5½ in. Pp 149. \$12.75.

Useful as a starting point for formulating cosmetic products, the book contains basic formulas for all types of cosmetic and toilet preparations. Included is a 4-p supplement giving the American manufacturers of the trade-mark products used in the formulations.

**The shopkeeper's security manual.** Kenneth Wright. Tom Stacey Ltd, 28 Maiden Lane, London, WC 2, 8 x 5½ in. Pp 112. £1.

With many goods now being sold in pharmacies on a self-selection, if not self service basis, it is important that money is paid into the till for all the goods picked up. Shoplifting can cause a very serious drain on profits but even worse is employee dishonesty and slack management. This book is designed to help owners or managers of retail shops in tightening up their security position.

# WHY GLASGOW?

by I. M. Caldwell, MPS, chairman, publicity subcommittee BPC 1971.

This blunt question in the invitation from Glasgow and the West of Scotland to the British Pharmaceutical Conference was followed by our own answer — Strictly speaking, because it is our turn. In essence, this is the truth. It is now 21 years since our itinerant Conference last rested briefly in Glasgow and since only about 20 centres in the country are physically capable of staging and accommodating the Conference it is truly "our turn".

But there is more to it than that. The city, its universities and its citizens together actively seek the opportunity to prove that Glasgow is not merely a conference centre but one of the finest centres in the Kingdom.

## A changing city

The pulp diet supplied by the "quality Sundays" and the BBC has sought to perpetuate the 1930's image of the Gorbals — Glasgow still has slums, as does every city in Europe, but we are undergoing the largest programme of urban renewal in the country. Glasgow's traceable existence as a settlement extends over a period of 2,000 years. Her present form evolved in the short space of 25 years — 1885 to 1910 — with the result that virtually the entire fabric of the city is reaching the end of its useful life.

Anyone who knew Glasgow in former times will find new prospects, new purpose. They will find, however, that the people have not changed, they are still garrulous, friendly and willing to argue about anything.

Strangers to the West of Scotland will probably have their own preconceptions of what the area and its focal point will be like. The city itself is both a University and a Cathedral town. Originally these two institutions were cheek-by-jowl in the North part of the early city, but the original University buildings were swept away by redevelopment last century and the University transferred to a magnificent site overlooking the River Kelvin.

At about the same time the Royal Technical College, which is the oldest institution of its type anywhere, found its permanent resting place near George Square and it was in this building that the first chair of pharmacy was founded. The College was later renamed the Royal College of Science and Technology and, latterly, the University of Strathclyde.

The original Strathclyde building now forms the nucleus of an expanding educational precinct whose boundaries are now overlapping the area of the original University of Glasgow.

The name Glasgow is of Gaelic origin and has been variously translated as "green hollow" and "dear green place". The "hollow" is readily understood, no matter from which direction one approaches the ancient Kingdom of Strathclyde, cradled as it is by the Highlands

to the North and West, the midland plateau to the East and the hilly border lands to the South. The "green" description is probably harder to understand today, but the extensive system of 59 parks within Glasgow conveys some impression of how softly green and pleasant a place was blotted out by acres of stone during the period of the Industrial Revolution.

Architecturally the city and its surrounding villages are of great interest. The city has splendid Victorian terraces and crescents, the finest complete Gothic building in Scotland in the form of its Cathedral and Provands Lordship, which is the oldest house, dating from 1471. Most of the work of Charles Rennie Mackintosh is to be found here, including the School of Art which is the venue of one of the optional excursions arranged for the Conference. Specimens of the work of "Greek" Thompson and Wm Adam are to be found, some of them now belonging to the Corporation. Villages in the Clyde Valley exhibit characteristics of the cottage industries such as weaving and rope making which abounded in the days before mechanisation. Indeed, Owen's experimental village of New Lanark would still be looked on as *avant garde* socially, if not architecturally, in modern times.

Although the Greater Glasgow conurbation contains about half of the total population of Scotland, its position and its communications network not only make it easy to reach but facilitate its use as a touring centre. Mountain and sea are both within twenty miles of the city and much use will be made of this fact during Conference Week.

It is possible to sail from the centre of Glasgow down river to the Firth of Clyde and cruise off rocky shores and round fertile islands — and in fact this is just what the main Conference Excursion will do. The vessel used will be the Queen Mary II—Clyde built, comfortable and designed for cruising.

The Conference will utilise the facilities of both Glasgow and Strathclyde Uni-

versities. Hall of residence accommodation will be provided in Strathclyde's Baird Hall, which is a converted hotel, and in the custom-built Queen Margaret Hall of Glasgow University. Both buildings are recently-opened and provide a high standard of accommodation with excellent facilities, all of which are fully detailed in the notes to applications, copies of which are available from the secretary. In our usual Scottish fashion, we specify that those members wishing to stay in halls of residence must pay for their accommodation at the time of application—thereby ensuring that we accumulate the interest, not the members.

The splendid Bute Hall of Glasgow University will be used for both the opening and closing sessions, and the professional, science and symposium sessions will be housed in the University of Strathclyde. Details of topics for discussion have not yet been finalised but we are assured that all the sessions will be of the highest standard.

## The social side

The local Conference committee have taken great care in arranging the 15 optional excursions which take place during the week. The Burns Country is an obvious choice as is the new University of Stirling. The essentially Scottish atmosphere is emphasised by tours of establishments engaged in the manufacture of knitwear, bagpipes and Highland dress and, of course, whisky. The City is proud of its rather bizarre Art Gallery the contents of which are representative collections of virtually every school of painting, together with a collection of artifacts historically associated with the area.

The social functions arranged for the week will ensure that there is ample opportunity for relaxation each evening after the day's sessions are over, as the provisional programme illustrates. The most interesting feature will be, in our opinion, the University function which is to take the form of a *conversazione*.

George Square, Glasgow

## British Pharmaceutical Conference 1971

This year's British Pharmaceutical Conference will be held in Glasgow from September 12-17.

The history of the Glasgow Royal Infirmary goes back to the year 1787. On January 5 of that year the first meeting of friends of the Royal Infirmary was held, when it was decided to appoint a committee to collect subscriptions and search for a good situation for the proposed hospital.

It is interesting to note that at the second meeting of the subscribers, which took place on January 5, 1788, the chair was taken by Dr David Dale. The name of David Dale is commemorated in the college where pharmacy technicians from hospitals in the West of Scotland now attend a day-release course for the pharmacy technician's certificate awarded by the Scottish Association for National Certificates and Diplomas.

On February 6 of the same year, it was decided to build on the site of the archbishop's castle, the present site, and on January 1, 1791, the Royal charter was obtained.

Until 1796, when the first apothecary was appointed, the offices of house surgeon and apothecary were combined, and James Burns, who later became Professor of Surgery in the University of Glasgow, held the first post.

In 1796 the first resident apothecary was appointed. This was the Reverend J. Allan who was also chaplain to the Infirmary. He was so efficient that the annual report stated that, after his appointment, "everything went on smoothly, the greatest satisfaction was on all hands manifested at the efficiency and economy of the administration."

The first Royal Infirmary had a bed complement of 150. Today it has 876 beds.

In the year 1826 a new and peculiar duty was added to those of the Infirmary apothecary. It was decided to purchase a barometer, a thermometer, and a rain gauge, and that an exact note of the temperature, rainfall and wind direction should be taken and recorded each day by the apothecary who thus became apothecary, chaplain and meteorologist. Though the present group pharmacist is still occasionally addressed as "The Apothecary" he does not discharge the other two duties.

Regarding the work of the apothecary of that day I want to quote from an old record:

"The Apothecary of the Glasgow Royal

# PHARMACY AT THE ROYAL INFIRMARY

by Adam Roxburgh FPS, Group Chief Pharmacist

Infirmary is an office bearer of such importance, and indeed, his duties are so multifarious, that he may well be styled the major domo of the whole establishment. Yet, strange to tell, the daily and hourly responsibility of this most important office bearer is at present remunerated with a salary of only £30."

## Present trends foreshadowed

So, even then, hospital pharmacy did not receive its due reward! One usually thinks of ward pharmacist schemes as being very modern and yet in the record of the work of the apothecary of that far off day there is this statement:

"He shall prepare the prescriptions of the medical attendants and be in attendance in the respective wards. He shall give the necessary instructions at the bedside of each patient who has been ordered medicine, how and when these are to be used."

The apothecary was at that time, as today, in charge of wines and spirits for medicinal purposes. The following interesting statement occurs in the records. "The price of wine has shown savings since being placed under the charge of the apothecary, but great waste of wine takes place while passing from the hands of the apothecary to the stomachs of the patients for whom it is ordered. All the nurses are, I understand, at present very sober and correct but they have not always been so!"

In 1794 the expenditure on pharmaceutical supplies was £173 compared with

a total expenditure in the Infirmary of £8,494, but in 1969/70 the expenditure was £350,000 out of a total of £2,451,842.

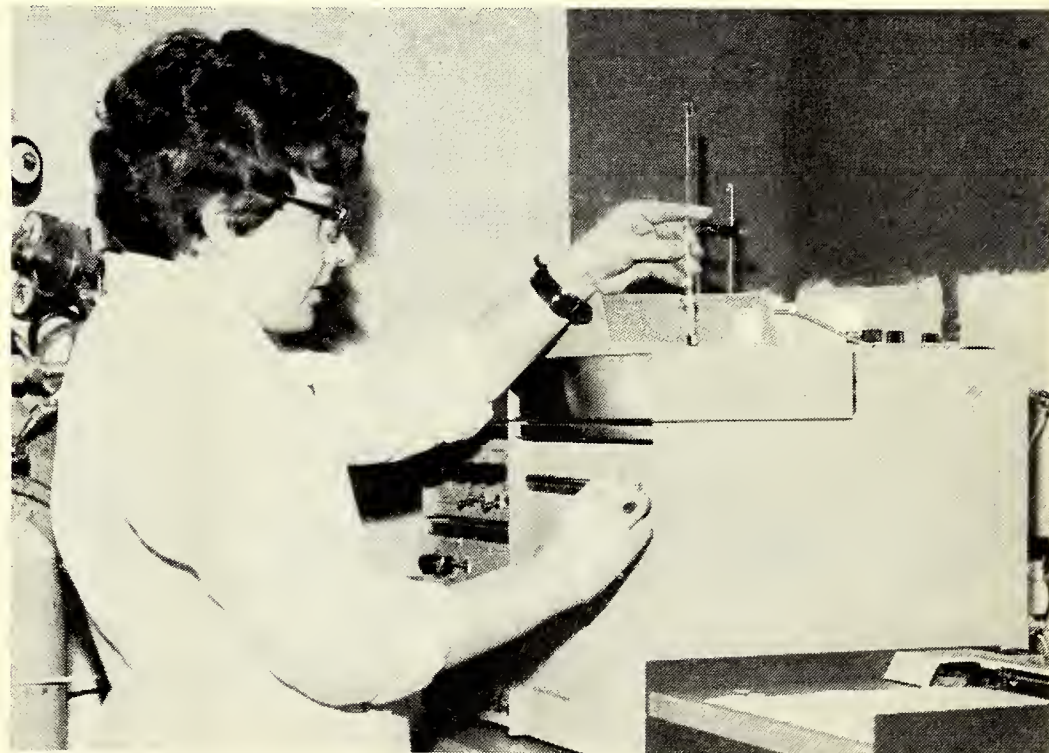

Glasgow Royal Infirmary is today one of the major teaching hospitals in the country with many University professorial units embracing most medical and surgical specialities. Many illustrious persons in medicine, surgery and other disciplines have worked in the Infirmary. Although the present building is not old, work is to start in the near future on a completely new hospital, on the present site.

The pharmacy department has a staff establishment of 55 persons of whom 33 are technical staff. Experiments are constantly being conducted in modern ideas in hospital pharmaceutical services, including a ward pharmacist scheme which is highly appreciated by both medical and nursing staffs.

The department includes a well-equipped laboratory for quality control and research and several projects relating to drug information services, additives to infusion fluids, the use of computers in pharmacy, etc, are in progress.

The group pharmacist, who has direct responsibility for three other hospitals in addition to the Glasgow Royal Infirmary, has also supervisory responsibilities in three other important hospitals, each with its own pharmacy staff.

The total bed complement of the group is 2,207 and out-patient attendances per year number 700,000.

Facilities for carrying out gas-liquid chromatographic analyses are available in the research section of Glasgow Royal Infirmary's pharmacy department

# From Paris

A world class eye make-up range for the  
British market.

We are an independent French cosmetic company with a record of 35 years of continuous expansion in France, and in other countries, through lively distribution.

Our main line is a leading eye make-up range of excellent quality in the medium-to-better price bracket. The range is internationally known, well accepted and has good representation in Chemists, Drug Stores, Department Stores, and all other appropriate outlets.

Our products are manufactured solely in Paris with the most modern equipment. Our packaging is outstandingly attractive and our prices are right for quantity sales in the British market.

**We seek a distributing arrangement with a well established and successful selling organisation covering the U.K. market, and possibly Eire.**

We believe in a two way agreement which will ensure continuous and unreserved co-operation.

Reply in confidence to Box No. 1750,  
Chemist and Druggist, Bouverie House, 154 Fleet Street, EC4A 2DL.

# LETTERS

## Dispensing doctors: the fallacy

Dr F. E. S. Hatfield in his letter (last week, p 544) says that he has "never been able to discover in what way the patient of a dispensing doctor suffers."

The answer to this is simply that his patient suffers from the lack of a second informed opinion upon the wisdom of the doctor's prescribing. Every patient is entitled to that safeguard but one wonders how many feel the lack of it as they receive medicine from their dispensing doctor's receptionist

With blatant attacks such as this made by Dr Hatfield upon the very reason for our professional existence, is it not high time we took a long cool look at ourselves and the image we have in the eyes of the public? For the real root cause of our problem is that by and large the public are unaware of the benefits they receive from an adequate pharmaceutical service.

It has been said before and I say it again, we desperately need a planned, co-ordinated and continuing public relations campaign to ensure that the public do become aware and remain so. Only then will they less-readily accept the second best of the uncontrolled, unsupervised and unskilled handling of their prescriptions.

J. Fenn,  
Gravesend

## The case against

May I make the following points to Dr F. E. S. Hatfield, regarding the role of the pharmacist, and rural dispensing.

Dr Hatfield asserts that dispensing causes practically no extra work to the doctor. According to a Department of Health official, an unskilled assistant is subject to direct supervision by the doctor, and the doctor retains complete personal responsibility for the medicine he has given to the patient.

Economically, the State benefits when a pharmaceutical service is provided; counterprescribing by the pharmacist relieves the cost to the State, and the work load on the doctor. The doctor derives an increased pension from dispensing, 75 per cent of the salaries of auxiliary staff is paid for by the State, also allowances are made for rent and rates. No pension is paid to the pharmacist, and the overheads for staff etc have to be largely borne out of the business.

Convenience to the patient: apart from the remote areas, without a pharmaceutical service, it is often just as convenient for the patient to obtain medicines from a pharmacy. With the advent of health centres, and shorter surgery hours, and closure of the centres from 12 noon on Saturday, until Monday morning, patients rely on a full service from the chemist. The rural patients, whenever possible, collect their medicines from the surgeries

and centres, and very often pass the pharmacy on their way there.

Supervision by the pharmacist: recently the Sheffield Hospital Management Committee decided to cease dispensing for out-patients in their hospitals, because of the shortage of pharmacists, and because their skilled technicians could not, therefore, be supervised by pharmacists. How many fatalities occur in the hospitals due to lack of supervision of drugs, on the wards? I assume that Dr Hatfield is aware that it is the responsibility of the pharmacist to check all prescriptions, and therefore the rural patient cannot have the benefit of this final check when receiving drugs from the surgery.

Dispensing doctors are not subject to inspection of their dispensing, quality of drugs, etc. Would they agree to the same rigorous testing schemes as the chemists? Would they agree to the same system of collection of the prescription charges and sorting of prescriptions as the chemist?

As the wife of a rural chemist I never cease to wonder at the statements made in defence of the continuance of dispensing by some rural doctors and their lack of concern, in that highly-potent drugs can safely be left in the hands of unqualified staff.

Dorah M. Shepherd,  
Pocklington, York

## Naïve argument

My dictionary defines "claptrap" as empty words, and whereas this is not an expression I would normally use, it seems adequately to describe the collection of unsupported assertions made by your correspondent, Dr Hatfield. The letter must have been written with the intention of impressing someone or other, but Dr Hatfield would be unbelievably naïve to think that it will impress one single pharmacist.

Pharmacists know that legally doctors could only be employed in a pharmacy as unqualified dispensers, and that the said doctors would only be allowed to dispense under the direct supervision of a pharmacist. This being so, what possible merit can be attributed to Dr Hatfield's claim to have "trained" his ancillary staff.

There is also the curious statement: "But let us remember that other doctors have no knowledge or experience of dispensing"—but the worthy doctor provides no indication or explanation why that same statement is not equally applicable to himself. Admittedly, he claims to have had 25 years' experience, but in the total absence of checks, tests, or examination of any kind in connection with his "experienced dispensing," the statement is purely subjective and meaningless.

I also find it odd that "in a properly organised practice dispensing causes practically no extra work to the doctor." If his dispensary contains modern, highly-potent and potentially dangerous drugs, surely the doctor takes his responsibilities seriously enough to check every single prescription that leaves his dispensary?

In this context it might be apposite to remind Dr Hatfield of the recently published figures for deaths caused by

iatrogenic conditions. In 1968, 2,739 people died as a direct result of drugs prescribed by GP's and the medical profession as a whole, and this figure is for *deaths* alone.

Recent estimates suggest that 1 in 5 of the population will occupy a hospital bed for no other reason than a lack of knowledge of the side effects of drugs, and a failure to provide the necessary continual check on the patient's condition during the period that the drugs are being taken.

In any other sphere of activity, that number of deaths would be classed as a national scandal and disaster, and yet, it seems, despite those grim figures, your correspondent doesn't write to *World Medicine* to plead for intensive post-graduate courses in pharmacology for GPs, but instead, advocates that his colleagues engage in "dispensing" activities for which, by his own admission, "they have no knowledge or experience."

Perhaps Dr Hatfield's thinking is reflected in his deplorable statement which begins: "If the patient's interests were really paramount."—I hold the curious conviction that the interest of the patient is not only paramount, but is the sole *raison d'être* for the entire Health Service.

Finally, and since your correspondent appears to be abysmally ignorant on matters pharmaceutical, may I correct his statement that the pharmacist makes a large contribution to the overall health care as a "surrogate doctor." Pharmacists are not surrogate anything; they make their contribution to the Health Service as members of the pharmaceutical profession, and they provide a pharmaceutical service as laid down in the Health Acts.

In this context, the survey to which Dr Hatfield refers showed that for every patient that consulted a GP, eight sought the advice of a pharmacist, and perhaps Dr Hatfield may care to note that this advice is provided *without charge of any kind* to the patient. One cannot but wonder that if pharmacists disappear, how the allegedly "overworked" GPs are going to cope with the additional work load—or is the overworked suggestion just another myth for the benefit of the jumble?

C. H. Brunning,  
Caergwre, nr Wrexham

## Who needs doctors?

Judging by the number of prescriptions I dispense that have been written by the receptionist—who needs doctors?

An SRN, an experienced medical representative, or a chemist for that matter, could diagnose and prescribe for the majority of minor ailments, seen by the average GP in a day's work.

The rest could be sent to a specialist, which is precisely what the GP does at the moment, so, who needs doctors?

In the 10 years that I have been a pharmacist, I have undoubtedly saved the lives of two patients and saved scores of others from pain, discomfort and anxiety, by doing my job and correcting the occasional prescribing errors made by doctors. I am sure this is the common experience of other chemists.

I do not condemn the medical profes-

*Continued on page 584*

*Continued from page 583*

sion for making mistakes. I merely wish to point out that, like the rest of us, they are only human—and that a qualified professional person who can be relied upon to filter out a mistake before it can harm the patient, is not to be dismissed so lightly.

When the prescription is handed to the chemist for dispensing, the responsibility for ensuring that the patient receives the correct dose of the correct drug, is the pharmacist's, not the doctor's.

And that, Dr Hatfield, is why we need pharmacists. With today's drugs, which are potent, complex in action and dangerous if misapplied, the need for a qualified person (with a great deal more than a few months' experience) is as great as ever.

In recent months, we have read in the Press of two cases in which hospital doctors have mistakenly written overdoses for patients. In both cases the patients died, because the nurses who administered the overdoses did not question the directions of the doctors.

Could Dr Hatfield guarantee that such tragedies would not be repeated in general practice, on a much larger scale, if the pharmacist was replaced by a £20-a-week woman with three month's training?

Richmond

P.S.: Should a dispensing doctor's unqualified help ever accidentally poison someone, no doubt he will defend himself without the aid of a solicitor. After all, who needs solicitors? Any competent clerk etc, etc, etc.

## Safety check

I was interested to read Dr F. E. S. Hatfield arguing his case for dispensing doctors being in the interest of the patient. His sense of infallibility places him in the position of a god, when one considers that he alone diagnoses the clinical condition of his patient, prescribes the drugs necessary, dispenses the drugs, and finally signs the death certificate.

I would have thought it in the patient's interest that a third party exist between the prescribing and the patient actually taking the drug, as a final safety check. Pharmacists have been doing this for generations and quietly covering up doctor's errors, overdoses, etc, rather than upset the doctor/patient relationship, thus perpetuating the myth of the doctor's infallibility.

R. N. Thomas  
Holyhead

## Contract at risk

I have sent the following letter to the secretary of the Central NHS (Chemist Contractors) committee:

The public did not take long to realise the difference between 12½p and 20p. Early last month there were signs that they were not much concerned, but the count at the end of the month revealed a serious fall in the numbers of prescriptions on which charges were paid. On making preliminary inquiries I have ascertained this

decline to be in the order of 30-40 per cent.

In these days of increased and increasing overheads I suggest that no pharmacy is able to continue for long in this climate.

Time has surely come for the Department of Health and Social Security to be informed that their contract with us is in jeopardy unless immediate action is taken to restore to contractors the necessary remuneration to enable them to continue to provide a pharmaceutical service.

F. B. Fawcett  
New Ferry, Cheshire

## Thanks for what?

Whilst it is true, as Mr Evens says in his letter (last week, p 544), that I thanked him for sending the Central Committee a copy of his alternative proposals on cost-related prescription charges, it is certainly not true that I remarked, "it would be a good thing for us if we could get your proposals accepted."

Similar proposals had in fact already been considered by the Committee and rejected as completely unacceptable.

G. T. M. David  
chairman, Central NHS (Chemist Contractors) Committee

## No change

Is it an accolade to be honoured with a mention by one who has read but a few pages of a 432 page thesis (E. C. Tenner, last week, p 546)?

Unlike the Committee on the Planned Distribution of Pharmacies (Sherwood Conference, C&D, April 3, 1971), which appears to be reversing the policy of the Society's Memorandum of August 1967, I have yet to declare a change of heart, clearly stating that the work was an examination of the problem, and not an attempt at postulating a solution.

His final aspersion concerning a supposed change of name is, alas, beyond my control. Even he should have noted that Council members tend to be described by their initials and surname.

However, to confuse E. C. Tenner even further (hiding as he does in cowardly anonymity), with your permission, Sir, I choose to sign myself,

David Hopkin Maddock  
Cardiff

## Pricing scripts

Mr Bell in his letter "Panic or logic?" April 24, page 515 seems to have rushed into print without much thought. He cannot have considered the problems involved. The Ministry say drugs will be in five or six groups, but these cannot be easily-seen groups, eg, "Analgesics" — anything from aspirin to Indocid and beyond, etc — because this would not be cost-related, and many drugs might fall in several groups.

The only possibility is a list stating which group each drug falls into. This list *must* cover *every* item a doctor could prescribe in any circumstances, including gin, brandy, etc.

I think such a list must contain at least 10,000 items and it must be kept abso-

lutely up-to-date. This may involve the pricier looking in a huge main list and possibly a dozen or so supplementary ones. When a chemist receives a script for an item which does not appear in *any* list, does he tell the patient to come back in a few weeks when he has the invoice?

It should be remembered that *any* error in pricing *must* cost the chemist money. The Ministry hold the clean end of a big stick and if a chemist undercharges, they will deduct the full amount, which could be another 30p. If he overcharges he will be required to refund the amount, obtain a receipt and forward it, as in other sections of the service.

On rota I often dispense 140-150 prescriptions in 1½-2 hours. I am certain that cost-related charges would add a further hour to this, to say nothing of the problems of split scripts because the patient has not enough money on them — or at all.

I have not mentioned the moral aspects on which I feel strongly. I cannot too strongly urge every chemist to write to his MP pointing out the huge cost of such a scheme, the impracticability and the indefensible moral aspects of cost-related charges.

C. A. Pickford,  
Grantham

## COMING EVENTS

### Sunday May 9

North-west Region, Pharmaceutical Society, Claremont hotel, Blackpool, at 10 am. Conference on "Unit packaging in pharmacy."

### Monday May 10

Birmingham Branch, Pharmaceutical Society, Room 118, University of Aston, at 8 pm. Annual meeting.

Cambridge and Huntingdon Branch, Pharmaceutical Society, Owen Webb House, Gresham Road, Cambridge, at 8.15 pm. Ladies' evening Mr P. Marlynn (Parfum le Galion Ltd) on "Perfume creation."

Enfield Chemists' Association, Postgraduate Medical Education Centre, Chase Farm Hospital, at 7.45 pm. Annual meeting.

### Tuesday May 11

Doncaster Branch, Pharmaceutical Society, Postgraduate centre, Doncaster Royal Infirmary, at 8 pm. Annual meeting.

King's Lynn Branch, Pharmaceutical Society, Wootton New Inn, South Wootton, at 8 pm. Ladies' night. Mr Bagnall-Oakley on "Norfolk wildlife through the seasons."

Leeds Branch, Pharmaceutical Society, Great Northern hotel, Leeds, at 8 pm. Annual meeting.

Pharmaceutical Group, Royal Society of Health, Eccleston hotel, London, S.W.1, at 7.30 pm. Dr A. C. Turner (senior overseas medical officer, Air Corporations Joint Medical Service) on "Motion sickness and travellers' diarrhoea."

South-east Metropolitan Branch, Pharmaceutical Society, Medical Centre, Lewisham Hospital, London, SE 13, at 8 pm. Film show, followed by annual meeting.

### Wednesday May 12

Swansea Branch, Pharmaceutical Society, Dragon hotel, Swansea, at 7.45 pm. Annual meeting.

Great Britain

## Pharmacist reprimanded for 'lack of supervision'

The manager of a Nottingham pharmacy from which Dexedrine tablets were said to have been sold to a woman without a doctor's prescription, was reprimanded for "lack of supervision" by the Statutory Committee of the Pharmaceutical Society last week.

Mr John Turton, manager of the Mansfield Road, Sherwood, branch of R. Weston (Chemists) Ltd, was, with the company, before the committee following the company's conviction at Nottingham in October 1970 for making the unauthorised sale, and for making it without the supervision of a pharmacist. The company had on that occasion been fined a total of £6.

Mr P. St John Howe told the committee that the case arose out of a police prosecution under the Drugs (Prevention of Misuse) Act whereby a dispenser employed at the branch pharmacy pleaded guilty to certain offences, and the company was fined for committing the offences arising from the same facts.

Mr Neville Thomas, for the company and Mr Turton, said the matter came to light as a result of a boy going into the pharmacy with an envelope addressed to the employee, who had been an unqualified assistant there for 25 years. In his absence, the envelope was opened by another member of the staff, who found it contained a note from the woman asking for the Dexedrine tablets. The boy was sent back to the woman with a message asking for a doctor's prescription. The matter was reported to Mr Turton, who interviewed the man the next day and found that the man had supplied the tablets to this elderly woman on more than one occasion over the past two years.

### 'Hawked around'

Mr Thomas said the police got on to the matter after the boy had "hawked" the woman's note around a variety of pharmacies, one of which had gone to the police. The employee was dismissed before he was prosecuted.

Mr Turton, in evidence, said the man concerned was an able employee, and he had never had any reason to doubt his behaviour. The woman concerned was a friend of the man, and he understood that the man had supplied her with the tablets because he felt sorry for her. She was a widow who had been taken off Dexedrine by her doctor because of her condition.

Mr Turton said he did not feel there was anything else he could have done to prevent such a long-standing and trusted employee from doing what he did. Since the incident, such drugs had been kept in a locked cupboard.

Mr Thomas said it was true that a rigid system of checking prescriptions against drugs would have enabled Mr Turton to

discover earlier what the man was doing. But with 220 branches the company had never been in any difficulties of this kind before. "Their security system is as good, if not better, than most," he said.

Announcing the committee's decision, the chairman, Sir Gordon Willmer, said: "We cannot be blind to the fact that this inquiry comes before us at a time when the illicit circulation of drugs is very much in the mind of the public. We cannot take anything other than a serious view when this particular supply of drugs has been discovered in the circumstances which have been related to us.

"I think all members of the committee fully appreciate the difficulties facing any pharmacist, especially one in charge of a large active business, in keeping a constant check on what goes out of the premises, otherwise than in accordance with the prescriptions duly recorded.

"But the committee is left in no doubt there has been in the past some laxity in supervision of these drugs at this branch. It seems to me, if the precautions which we are told are now being taken, had been adopted well before this incident took place, the probability is that this supply of drugs to the woman would never have happened at all.

"In these circumstances Mr Turton should be reprimanded in respect of the lack of sufficient supervision which has occurred in the past. I would couple this with a warning, in no uncertain terms, against allowing this sort of thing to happen in the future. But so far as Mr Turton is concerned, having issued that reprimand and warning, we propose to take no further action against him."

The chairman said that the company seemed to be fully alive to its responsibilities, and no action would be taken against them.

The Committee deferred judgment for a year in the case of a pharmacist convicted of selling Gynovlar 21 other than on prescription and of failing to label the container in the prescribed manner. He had been fined a total of £40 and ordered to pay £5 costs.

Mr St John Howe, for the Society, said that the Society had heard from the Medical Defence Union that a doctor alleged that a local chemist, unnamed, was selling drugs which were on prescription.

A test purchase was made with the help of a woman acting as an agent. She asked the pharmacist if she could have a packet of Gynovlar 21. He replied "yes" turned to reach for it and asked:

"Have you got a prescription for it?" She said she had not and said the pills were for a friend. The pharmacist told her, "All right, remember this has not happened." She was charged seven shillings for the packet which did not carry the name and address of the seller.

A woman who had been interviewed said in her statement that she had asked the pharmacist if he could tell her anything about "the pill." He had sold her a packet of Gynovlar and she had bought some from him since, at no time with a prescription.

The pharmacist told the committee he did not make the remark "remember this has not happened." After expressing his regret he said that for two and a half years he had been watching his wife's health decline terribly. The worry had "played havoc" with his behaviour and led to what had happened.

The chairman said the committee took a serious view of the case, but proposed to give the pharmacist the chance to prove his contrition.

The committee decided to take no further action against Brideoak Pharmacy Ltd, formerly known as Collegiate Chemists Ltd, alleged to have carried on business in such a way that patients could have believed the pharmacy was related to a doctors' practice in the same building. The case was first heard in March 1970, when it was found that although there was no actual business association, there might be ground for the public to believe such a relation existed.

In a further case, the committee decided to take no further action against a pharmacist convicted of theft from his employers. The chairman said they found the case puzzling and not altogether satisfactory. Although convicted and fined, the pharmacist had throughout maintained his innocence, though neither he nor his counsel had thought to question the conviction. Evidence of good character had been produced and the pharmacist had made a fresh start in new surroundings.

## New officers

### Pharmaceutical Society

**Birkenhead and Wirral.** Chairman, Mrs E. R. Booth, treasurer, R. B. Kennish; social secretary, M. Weinronk; secretary, D. J. Poole, 13 Vernon Avenue, Hooton, Wirral, Cheshire L66 6AL (telephone 051-339 3123).

**London.** Chairman, G. H. P. Brand; vice-chairman, S. Blum; secretary, E. Weyman, 4th floor, Thonock House, 34 Cursitor Street, London EC4A 1LT (telephone: 01-405 6563).

## Signs of hope for future of pharmacy

Pharmacy is beset by attitudes of resistance to change and dissatisfaction with the present situation; yet there are signs of hope for the future, stemming from a return to the profession's original concepts, according to Professor M. Brown.

Professor Brown had selected the title "Is pharmacy dead?" for his inaugural lecture as head of the department of pharmacy at the University of Aston in Birmingham last week.

Starting from the question: "What is pharmacy?" he defined his concept as "a profession exercising responsibility for the preparation, potency and safety of drugs and medicines on behalf of the community at large."

In his view the crucial distinction between medicine and pharmacy lay in their respective fields of responsibility. "A physician is directly responsible for the health of his patient, while the pharmacist is directly responsible for the potency and safety of medicines."

Turning to the different branches of pharmacy, he said he would like to see a closer working relationship between the somewhat isolated retail pharmacist and his hospital colleague. Looking at the comprehensive responsibility of the pharmaceutical community, what had pre-

viously been minor areas attracted more attention. Pharmacy could help illuminate the enormous problem for society which had been posed by the widespread use of potent chemicals for animal and crop use.

The pharmacist was a retailer with a radical difference — his scientific knowledge. This led on to the question: would society be better or worse off if pesticides and all products agricultural or otherwise involving biologically potent chemicals were controlled and distributed by the pharmaceutical profession?

### Scope for talents

In the hospital service, it was generally agreed that, rightly or wrongly, the pharmacist usually had poor status and a scandalously poor salary. Nevertheless, it seemed clear that hospitals offered a wide scope for both professional and scientific talents. Current developments in this field seemed healthy, declared the speaker.

He strongly attacked resistance to change: "Much of our questioning is, in fact, about the means of keeping things as they are, or even about how to get back to things as they were." In the academic sphere, writing the word "change" in a syllabus was not enough. Sectional categories in the pharmacy course might well be necessary for administrative reasons, but they must not be thought of as absolute academic barriers. To present an integrated approach to the undergraduate means cutting across current boundaries. Biopharmaceutics and pharmacokinetics did this, but they themselves

might form the barrier of the future.

Another question asked by Professor Brown was: "Is there a viable institution exercising responsibility for medicines?"

In his view the Pharmaceutical Society, in the widest sense, performed that function in a comprehensive, continuous way.

Continuity was essential in the historical sense—past errors could be remedied more effectively by a continuous Institution—but not only in that sense. There should be no stage between the manufacturer of a medicine and its action on a patient at which standards were not consciously safeguarded.

Professor Brown concluded: "Early in the development of pharmacy, each individual pharmacist was likely to be called upon to use a wide spectrum of pharmaceutical talents during his working day. He experienced a unity in his daily work. With specialisation, various pharmaceutical functions became fragmented. What we now witness is a revolution, not in the sense of a destruction of the old but rather a return to original concepts, that is a renewal—a new life. The difference from the old is that the unity is not seen in the daily work of each pharmacist but in the unity of the comprehensive, continuous and collective responsibility of the whole profession. Each new graduate brings new talents to help the pharmaceutical community in its communal work, namely our communal concern with medicines. I am hopeful for my profession and I am hopeful for the future of the Department of which I am proud to be the head."

**This is no ordinary jar of Bunty Baby Cream**

**~it's a free one!**

Ostensibly, this is just like any other Bunty jar, packed with highest quality protective antiseptic cream. But here's the difference — order a dozen medium or large jars between now and May 31st, and you get this extra jar free. You also, incidentally, get the benefit of a major consumer advertising campaign scheduled for May and June. So order now.

**Bunty give you 13 to the dozen 'til May 31st**

Bunty Baby Products from Cartwrights (Rawdon) Ltd., Lakeside Laboratories, Rawdon, Leeds LS19 7YA.

# MARKET NEWS

## Iodides again dearer

London, May 5: For the second time in about two months higher rates for iodides have been announced. The potassium salt has gone up from £2.03 kg to £2.16 for 50-kg lots and the sodium from £2.58 to £2.75. Resublimed iodine is also dearer at £2.85 kg for 250 kg, but iodoform, which was advanced about two weeks ago, stays the same.

A feature of the crude drugs section is the growing list of items for which there are either no stocks or very little. On spot benzoin has become exceedingly scarce. Also scarce are white squill, hyoscyamus and sarsaparilla. Buchu, camphor powder and quillaia were easier in price.

So also was Chinese menthol, but Brazilian again turned firmer rising to £5.40 kg (from £5.30) on spot. Quotations for East Indian nutmegs were withdrawn. Turmeric was firmer by £5 ton, while African and Jamaican gingers were higher than previously. Celery seed was down by £5 ton on spot.

In essential oils patchouli and Brazilian peppermint were marked up. Scarcity of caraway seed was said to be responsible for higher oil prices from Holland. While sweet orange oil remains quiet, demand for bitter has increased and prices have firmed.

## Crude drugs

**Aconita:** *Napellus* Spot cleared; £1,250 metric ton, cif.  
**Agar:** (lb) Kobe No 1 £0.85, cif; European from £0.73.

### BUSINESS OPPORTUNITIES

## WHO WILL MERGE WITH US?

Progressive Store, selling toiletry, fancy goods, household, hardware and canned foods at competitive prices, seeks expansion (within 25 miles radius of Worthing) by acquiring new shops and/or amalgamating with a Company or persons having growth ideas. Alternatively, we could purchase an interest in an existing business. In all cases arrangements could be made for owners and/or existing staff to be kept on and participate in profit sharing scheme. This would be an ideal opportunity for a tobacconist, chemist, hardware or grocery store owner, as our associate wholesale company could meet expansion needs. Every reply will be acknowledged.

BOX 1752

### AGENTS

#### AGENTS

Required for Scotland, Wales, West Country and Midlands Wholesale. Trade only. Toiletries etc. fast selling. Apply Box No. 1745.

Independent representatives will be given wholesale terms to sell into Chemist shops.

### HOSPITAL APPOINTMENTS

## Mansfield Hospitals

### Post Graduate Student King's Mill Hospital

Owing to one student having withdrawn his application on  
finding a vacancy nearer his home, there is a vacancy  
in this new and modern area pharmaceutical department  
which serves 10 hospitals (1,762 beds) in the Mansfield  
district. The department is situated on the Mansfield—  
Sutton-in-Ashfield border, 3 miles from M1 and  
not far from Nottingham.

More details from C. H. Preston-Robinson, Group  
Pharmaceutical Officer.

Salary £1,000 per annum plus £25 higher qualification  
allowance. Good accommodation at a reasonable charge  
is available for a single person.

Applications to Group Secretary, Oak Bank, Crow Hill  
Drive, Mansfield, Notts.

HAMMERSMITH HOSPITAL, W12  
Pharmacy Technician Grade 1 re-  
quired at the above hospital. Varied  
and stimulating work in all sections  
of teaching hospital pharmacy  
providing comprehensive service  
(including participation in medical  
research and development). Salary  
scale £822-1140. Telephone Chief  
Pharmacist (743 2030, ext 37).  
545

Royal Berkshire Hospital, Read-  
ing, Pharmacy Technician 1 with  
Apothecary Hall Certificate or equi-  
valent required. Hospital experience  
not essential. Apply: Mr. E. A.  
Burton Group Pharmacist, naming  
two referees, or ring Reading  
85111 ext 302.

### ILFORD AND DISTRICT HMC

#### GROUP PHARMACY SENIOR PHARMACIST

This is a group post with  
duties at Barking Hospital,  
Upney Lane, Barking,  
Essex and King George  
Hospital. Whitley Council  
salary and conditions of  
service. Apply to Group  
Secretary, King George  
Hospital, Eastern Avenue,  
Newbury Park, Ilford,  
Essex.

## BIRMINGHAM REGIONAL HOSPITAL BOARD THE UNIVERSITY OF ASTON IN BIRMINGHAM

## M.Sc. course in pharmaceutical sciences

A two-year sandwich-type course leading to the degree of M.Sc. in pharmaceutical sciences has been established at the University of Aston in Birmingham. The next course will commence in January 1972. The course is sponsored by the Birmingham Regional Hospital Board, who finance each year eight new supernumerary appointments in selected hospitals in the region.

The minimum entry requirement for the course is normally a second class honours degree (Division II) in pharmacy of a British University or its equivalent. Consideration will also be given to candidates with equivalent professional qualifications associated with industrial or other experience. The course tutor may also require adequate additional tuition in topics currently presented in the final year of the first degree course.

Applications are invited for these appointments which are open both to candidates already employed in, or planning to join, the hospital service. The salary for the posts will be in accordance with the scale commencing at £1,325 per annum. Application will be made for authority to enable candidates already employed in the service to retain their existing salaries.

Selection for the course will be made by the University in conjunction with the Board, and by HMCs or the Board of Governors taking part in the scheme.

Application forms from the course tutor, Dr. A. Z. Britten, Department of Pharmacy, The University of Aston in Birmingham, Gosta Green, Birmingham B4 7ET to be returned by 21st July, 1971. The syllabus for the course is available on request to the University.
